BA is most sought after in IT domain, with a whopping 61.1% of open positions being in this field

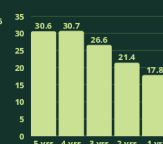

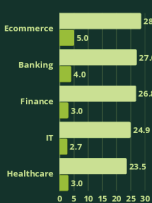

45.6% of BA jobs require at least 2 years of working experience

Most BA jobs, or 42.2%, are of Junior level

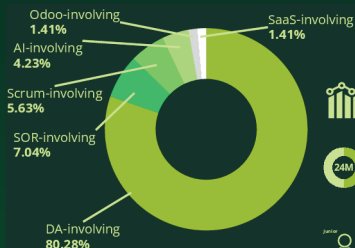

Ecommerce, Banking, Finance, IT and Healthcare are the five domains which offer the highest salary for a BA position.

The average working experience required for these domains ranges from 2.7 for IT to 5 years in ecommerce.

A BA is expected to be paid an average of 30.6 million VND per month when they reach 4 year of experience whereas one with 1 year experience would earn an average of 17.8 million.

G-sun Group currently offers up to 45 million VND per month for a BA of 5-year experience, which is also the highest salary offered in the data.

The pie chart shows unique skills for a BA (skills not usual when it comes to a BA position).

Data Analytics (DA) is the most popular among those skills, as they make up 80% of the pie.

Is DA vital
to BA?

BA is often mistaken for DA, and vice versa, despite being different. However, various data analytics skills have been gaining traction for BA jobs these days.

DA-Involving BAs are averagely paid the same amount as traditional ones, which is around 24 million VND per month

Data analytics skills are most commonly seen in Junior & Middle BA level, with 24 and 18 open jobs respectively.

Data analytics is also needed the most within the first 3 years of experience as a BA. The next years of experience **might have been a more focused role on the business or system aspect.**
